Figure 1 is a scatter plot with the x-axis labeled 'Number of children' ranging from 0 to 10, and the y-axis labeled 'Number of children who are not in school' ranging from 0 to 10. The data points are plotted at (0,0), (1,1), (2,2), (3,3), (4,4), (5,5), (6,6), (7,7), (8,8), (9,9), and (10,10). A solid line represents the identity function $y=x$. A dashed line represents the function $y=x-1$ for $x > 0$. The area between the dashed line and the identity line is shaded.

Trial	Control	MCI	AD
1	90	80	60
2	90	75	55
3	90	70	50
4	90	65	45
5	90	60	40
