To Whom It May Concern

December, 12, 2007

Letter of Recommendation

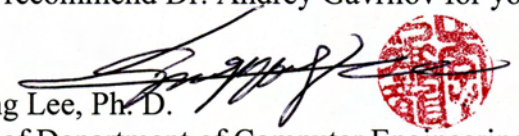

I know Dr. Andrey V. Gavrilov from September 2005 when I invited him to participate in visiting professorship supported by Korean Government and orienting to teaching advanced information technologies for foreign students.

During his work in our Department of Computer Engineering of Kyung Hee University (from September 2005 to December 2007) he are dealing with teaching (in English) for master and PhD students from Bangladesh, China, Korea, Nepal, Vietnam, Pakistan studying in our and other Departments, and research in my Ubiquitous Computing Laboratory (http://uclab.khu.ac.kr).
He prepared and touch (lectures and term projects, 2 courses per semester) follow subjects: "Intelligent systems", "Soft Computing", "Neural Networks and its Applications", "Technologies of Expert Systems", "Intelligent Robots", "Artificial Life", "Development of Games", "Machine Learning", "Machine Vision", "Hybrid Intelligent Systems". In these courses he applied own results of research in different areas of Artificial Intelligence both theoretical and practical, e.g. software ESWin for development of Expert Systems, software for experiments with artificial neural networks and so on. His courses were very popular among students, e.g. number of members of some his classes run up to 50.

He was co-advisor of student research group "Knowledge Processing" in our lab, co-advisor of PhD student, who will defend thesis in February, 2008, actively participated in seminars and meetings of our laboratory, during two first semesters was supervisor of own seminar "Intelligent Systems".
During staying in our university Dr. Andrey Gavrilov prepared and published 6 papers and also 15 joint papers with students in major conferences and in journals.

During working in Kyung Hee University Andrey Gavrilov demonstrated careful attitude toward his duties, high efficiency and enthusiasm in working, good and respect attitude to students and his colleagues.
Andrey V. Gavrilov made great contribution to the growth of our Ubiquitous Computing Laboratory at Department of Computer Engineering of KHU.

I strongly recommend Dr. Andrey Gavrilov for your consideration.

Sungyoung Lee, Ph. D.
Professor of Department of Computer Engineering of Kyung Hee University,
Director of Neo Medical u-Life Care Information Technology Research Center
in Kyung Hee University
